<input type="checkbox"/>	GNAS	Mutation	Exon 8 Codon 201				
<input type="checkbox"/>	JAK2	Mutation	Exon 14 Codon 617				

- Tumor areas were prepared and DNA extracted from formalin-fixed and paraffin-embedded (FFPE) slides.
- No microdissection was performed due to small amount of material. The whole DNA was prepared and used for examination.
- DNA was used for PCR and was suitable for further examinations suitable unsuitable.
- content of tumor (%): number of slides: text module:
